The TransView Mobile LCD Monitor is versatile, reliable, and ideal for bus installations. This Mobile 5.6" LCD Monitor is an excellent tool for assisting your drivers in situations where they must put the vehicle in reverse. Used in tandem with the TransView Rear View Camera, the LCD Monitor provides a wide-angle view of the back of the vehicle – thereby increasing safety and reducing maintenance/repair costs. The compact 5.6" screen of the TransView Mobile LCD Monitor is designed to be small enough to be non-intrusive in the driver's environment. The aspect ratio of the monitor is 4:3 instead of 16:9; this means that the display on the screen will properly fit and will not be "stretched" by widescreen aspect ratio monitors.

TSI is dedicated to providing you with the video surveillance equipment necessary for protecting your transit customers and assets.
